Test-Taker Experience

Test-takers log on to go.proctoru.com and create an account (Figure 1). When the test-taker logs in for the first time, they are prompted to complete their profile information (Figure 2).

This screen includes their basic information such as name, address, and contact phone numbers, as well as the test-taker’s institution enrollment. Specific flag notes for the test-taker and any special conditions are also displayed here for proctor and institution use only.

At the bottom of the page above the Complete my Profile! button, the terms and conditions of use must be checked to complete the profile (Figure 3). A flagged message will display at the top until the test-taker agrees to the terms and conditions.

Subsequent logins will direct test-takers to the My Exams page.
As part of their personal profile test-takers select and update their testing preferences for schedule availability when selecting a testing time slot.

Upon logging in, the profile setup prompts test-takers to set up these preferences. After setup, there is a link to personal preferences in the top right when a test-taker clicks on their name. Choosing the Preferences link displays the page seen in Figure 4.

Test-takers can choose a general time window from the drop down menus.

They may also select a custom time frame by highlighting the days and times preferred.

Once test-takers finish choosing their time options, they click Save and Update to set their preferences.

Time preferences are displayed on the left menu bar for each specified day. These preferences can be updated at any time to reflect test-taker availability via the preferences link in the top-right of the page under the test-taker’s name.
Once a profile has been completed, or for a previous test-taker, the first login page will default to the My Exams page. If no exams are scheduled, the page will appear as in Figure 5.

A test-taker may click on the Schedule New Exam button either in the top-right or, if there are no active reservations, within the center of the page.

After clicking the Schedule New Exam button, a page with three drop-down menus appears. The test-taker will confirm the institution, select the exam term and select the specific exam they wish to take (Figure 6).

After choosing a specific test and clicking Find Reservations, the scheduling page will appear.
After selecting the test appointment, it is either added to the test-taker’s cart for payment and checkout (Figures 8 and 9) or the test-taker is sent back to their My Exam page. (Figure 10)

On the My Exam page, test-takers can view their recently scheduled exams and upcoming exams.

Please refer to Figure 7 at top-right for the following:

1. At the top of the page, the specific exam information is shown including: exam name, course ID, institution, instructor, available dates and blackout dates (if applicable). If enabled, there is also a Take It Now button option.

2. Appointments display using the time range listed in personal preferences. The test-taker can also choose a time range to find an appointment for their exam by adjusting the slider bar or view all available appointments by clicking the View All button on the right.

3. Adjusting the slider causes the available reservations list to display the available time slots for scheduling. Clicking on the BOOK IT button chooses a time slot.

After selecting the test appointment, it is either added to the test-taker’s cart for payment and checkout (Figures 8 and 9) or the test-taker is sent back to their My Exam page. (Figure 10)
After scheduling their exams, test-takers will see a **countdown** to their closest exam time at the top of their My Exams page, shown in Figure 11. At the appointment time, a test-taker will click on the **Start** button next to the appointment, which will take them to the proctoring room. Here, they will be prompted to download and run an applet as shown in Figure 12.

Figure 13 shows the downloaded applet, which connects the examinee’s screen to the proctor. Once the test-taker has connected their screen to the proctor, the proctor connects the two-way video and audio connection.

When the proctor connects in the proctoring room, the test-taker’s video is shown in the bottom right corner and the proctor’s video is on the left, as illustrated in Figure 14. This picture represents what the test-taker sees. The proctor’s view of the test-taker is much larger and there is also a zoom option.
Authentication and Securing the Area

After the examinee is connected to their proctor via webcam and screen-sharing software, the proctor asks to see the test-taker’s ID, as seen in Figure 15.

The ID information in Figure 15 has been intentionally blurred for privacy reasons. In an actual proctoring session, the test-taker would be required to show a fully-visible ID so that the name and picture can be clearly seen and read by the proctor. A photograph of the examinee’s face is then taken to keep on file to help authenticate his or her identity.

Parameters for the test are communicated verbally and in writing to the test-taker, who then acknowledges that they understand the instructions. The proctor then authenticates the test-taker with a quiz that uses challenge questions based on publicly available personal questions, as shown in Figure 16.

Questions are typically related to previous addresses, phone numbers, roommates and relatives.

Next, the examinee is asked to pan their camera around to show their complete workspace and testing area so the proctor can observe the test-taker’s surroundings, as seen in Figure 17.

If the camera is internal, to ensure that there are no unauthorized materials attached to the test-taker’s computer monitor, the examinee is asked to show the proctor the edges of their monitor using a reflective surface such as a mirror, sunglasses, DVD or CD as shown in Figure 18.

After the proctor confirms that the monitor and work area are clear of all unauthorized materials, the proctor will ask the test-taker to move any cell phones or other electronic devices away from the testing area.
ProctorU actively engages test-takers in real time in order to prevent most incidents of academic integrity. Any suspicious activity – including but not limited to using unapproved sources, leaving the computer during the exam or communicating with another person – is documented using photos or video and reported to the institution within two business days.

Once the exam has been completed, the examinee shows the proctor their submission screen, as shown in Figure 21, and an exam end time is logged.

During the exam, test-takers are proctored by monitoring their video feed and testing environment. Screen-sharing technology allows the proctor to see everything that is happening on an examinee’s computer. Proctors also monitor the test-taker audibly, to ensure they are not receiving verbal answers from an outside source.
